PROBLEMS OF CONTROL AND INFORMATION THEORY, VOL. 17 (1988)

SUBJECT INDEX

Aroutunian, E. A., Aroutunian, M. E.: E-capacity upper bound for a channel with random parameter. **17,** *2*, pp. 99–105

Aydinian, H. K.: A T-family extremal problem in Hamming space. **17,** *1*, pp. 33–36

Böhm, J.: Set point control and offset compensation in discrete LQ adaptive control. **17,** *3*, pp. 125–136

Brykalov, S. A.: Equilibrium existence for some heating control systems. **17,** *6*, pp. 371–380

Bukov, V. N., Khorvat, Ya.: A comparative analysis of some algorithms for the identification of parameters of a linear dynamic object. **17,** *4*, pp. 239–251

Čelikovský, S.: On the Lipschitzean dependence of trajectories of multi-input time dependent bilinear systems on controls. **17,** *4*, pp. 231–238

Feistauerová, J.: An entropic test of uniformity and optimality of codebooks. **17,** *5*, pp. 311–317

Frauendorfer, K., Kall, P.: A solution method for SLP recourse problems with arbitrary multivariate distributions — The independent case. **17,** *4*, pp. 177–205

Garai, V., Szabó, Cs., Szép, T.: New multiple access algorithms for integrating voice and data on local area networks. **17,** *6*, pp. 381–396

Grodzki, Z., Łatko, M.: The nets of conjugated shoft registers. **17,** *3*, pp. 159–170

Gusak, P. P., Sorkin, L. R.: Minimax function approximation by noisy observations under nonparametric uncertainty. **17,** *1*, pp. 37–47

Gusev, M. I.: On the stability of solution of the inverse problems in control system dynamics. **17,** *5*, pp. 297–310

Janžura, M.: Prediction in zero-one random sequences. **17,** *1*, pp. 15–22

Ježek, J. Otáhal, A.: Two-dimensional Fisher's test. **17,** *2*, pp. 107–115

Kerekes, I.: The Third International Workshop on Information Theory "Convolutional Codes; Multi-User Communication". **17,** *3*, pp. 171–172

Kogan, Ya. A., Pukhalsky, A. A.: Tandem queue with finite intermediate waiting room and blocking in heavy traffic. **17,** *1*, pp. 3–13

Kramosil, I.: Expert systems with non-numerical belief functions. **17,** *5*, pp. 285–295

Krasovskii, N. N., Reshetova, T. N.: On the program synthesis of a guaranteed control. **17,** *6*, pp. 333–343

Kurzhanskii, A. B., Filippova, T. F.: Dynamics of the set of viable trajectories to a differential inclusion: the evolution equation. **17,** *3*, pp. 137–144

Nguyen Quang A: Elementary proof of Rueppel's linear complexity conjecture and a construction of sequences with high linear complexity and good correlation properties. **17,** *2*, pp. 91–98

Nguyen Quang A: Families of sequences with optimal generalized Hamming correlation properties. **17,** *3*, pp. 117–123

Nguyen Quang A, Zeisel, T.: Bounds on constant weight binary superimposed codes. **17,** *4*, pp. 223–230

Niederreiter, H.: A simple and general approach to the decimation of feedback shift-register sequences. **17,** *5*, pp. 327–331

Piunovski, A. B.: The discounted controlled Markov chain with delay. **17,** *5*, pp. 267–284

Plochov, A. G., Burgmeier, P.: An approach of approximating the ε-Null-controllability set of nonlinear nonautonomous systems. **17,** *6*, pp. 357–369

Raol, J. R., Sinha, N. K.: Estimation of states and parameters of stochastic nonlinear systems with measurements corrupted by correlated noise. **17,** *3*, pp. 145–158

Salyga, V. I., Rudenko, O. G., Obruchev, V. L.: Reduced multi-step algorithms for identification of linear plants. **17,** *1*, pp. 23–32

Solomentsev, Yu. M., Frolov, E. V.: The mathematical model of flexible machining-cell. **17,** *2*, pp. 77–90

Strejc, V.: Discrete version of model-in-the system control. **17,** *2*, pp. 71–76

Szabó, Cs.: MELECON '87 — The Mediterranean Electrotechnical Conference. March 24–27, 1987, Rome, Italy. **17,** *3*, pp. 173–174

Terdik, Gy.: Generalized Hermite polynomials and estimation of kernels for discrete *I/O* Wiener process. **17,** *1*, pp. 49–61

Tret'yakov, V. E.: Synthesis of optimal guaranteeing control. **17,** *4*, pp. 207–221

Vajda, I.: Minimum-distance and gnostical estimators. **17,** *5*, pp. 311–317

Veres, S.: Asymptotic distribution of maximum likelihood estimators for nonstationary autoregressive processes. **17,** *1*, pp. 63–70

Zyablov, V. V., Shavgulidze, S. A., Shanidze, M. G.: Bounds on free Euclidean distance for various systems of modulation and coding. **17,** *6*, pp. 345–356

PROBLEMS OF CONTROL AND INFORMATION THEORY, VOL. 17 (1988)
